An intricate and well-worked updating of the traditional Tudor design, introduced by Henry VII and continued, virtually unaltered, from Henry VIII to James I's second coinage. The emphasis on royal power and prestige remains unchanged but the large English rose on the reverse is replaced by the quartered arms of the now united kingdoms of England and Scotland.

- 117 **James I**, third coinage, angel, mm. trefoil over lis both sides, the archangel Michael slaying the dragon, mark of value in field, *rev.* ship sailing l., (S.2635; Schneider 81), *slight crease on reverse, otherwise good very fine or better with a reddish tone* £2500-3000

The angel is another mediaeval design which is adapted in the seventeenth century in a similar manner to the rose ryal. While the obverse design remains largely the same, the ship on the reverse is updated and becomes less stylised and again the banner of the new United Kingdom features prominently as the billowing sail.

- 129 **Charles I**, triple unite, Oxford mint, mm. plume/-, 1644, crowned bust of king l., holding sword and olive branch, plume behind, *rev.* declaration on scroll between mark of value and date, three plumes above, OXON below (S.2729), *the obverse die shows signs of brushing, the reverse die cracking, the coin itself an attractive good very fine with a marvellous portrait* £16000-18000

This the largest and heaviest hammered gold coin ever produced in England was, surprisingly, never struck in London. Only during the Civil War when Charles I's government operated in exile from Oxford did this unusual denomination fleetingly appear.

- 130 **Charles I**, triple unite, Oxford mint, mm. plume/-, 1642, crowned bust of king l., holding sword and olive branch, plume behind, *rev.* declaration in three wavy lines between mark of value and date, three plumes above (S.2725; Brooker 830), *good fine or better but heavily tooled,* £5000-5500

The Siege of Pontefract –1648/9

After Cromwell took control of most of England in 1646, there was spasmodic resistance from forces loyal to the king. A royalist rising was crushed in Wales in May 1648 and at Colchester a royalist army from Kent was besieged and finally starved into submission in August. Further north, Pontefract Castle was taken for the king at the beginning of June 1648 and it was hoped that it would act as a base for a royalist revival with the aid of an army being raised in Scotland at the time by the Duke of Hamilton. On his way south, the Duke relieved Carlisle and joined forces with Sir Marmaduke Langdale. Soon after, however, his army was defeated at Preston and any revival based around events in the north began to look increasingly unlikely. The fall of Colchester to the Roundheads made the situation worse still. Despite this gloomy outlook, the castle held out throughout the autumn and winter of 1648/9, resisting the best efforts of Cromwellian generals Rainsborough and Lambert who had taken Colchester in the summer. The castle finally fell at the end of March 1649. Although one of the largest in England, it was then systematically demolished within a matter of weeks.

Two series of coins were struck by the defenders of the castle before and after the execution of Charles I on 30th January 1649. Both issues consisted mostly of lozenge-shaped and octagonal shillings, but the series bearing the name of Charles II included a unique gold unite which was purchased by us from Christie's in 1989. No gold is known from the series bearing Charles I's name but two or three two-shilling pieces have survived, including the specimen offered here.

- 138 **Charles I**, Pontefract besieged, shilling, 1648, octagonal, crown above C-R, *rev.* castle between OBS and sword, PC above, date below, weight 4.83gms (S.3148), *nearly very fine with a granular surface, perhaps fire damaged* £2500-3000

This coin was acquired with the previous lot and there were two coins in the original lot in the Duke of Devonshire sale – could it be that they are the original pairing?

- 139 **Charles I**, copper 'Richmond' farthing, type 1g, on uncut square flan, crown and sceptres, *rev.* crowned harp (S.3187A), *part of coin missing but very fine or better with traces of original lustre* £100-150
- 140 **Commonwealth**, unite, mm. sun, 1649, English shield of arms within wreath, *rev.* conjoined shields, mark of value above (S.3208), *slight crease, good very fine on a large, round flan* £3000-3500

- 142 **Commonwealth**, unite, mm. sun, 1651, English shield of arms within wreath, *rev.* conjoined shields, mark of value above (S.3208), *small flan flaw on reverse, otherwise almost extremely fine* £,3000-3500
- 143 **Commonwealth**, double crown, mm. sun, 1650, English shield of arms within wreath, *rev.* conjoined shields, mark of value above (S.3210), *some pock-marking, creased, otherwise about very fine* £,1000-1200
- 144 **Commonwealth**, crown, mm. sun, 1650, English shield of arms within wreath, *rev.* conjoined shields, mark of value above (S.3212), *creased and with one small edge nick, otherwise about extremely fine with an attractive red tone* £,2000-2500
- 145 **Commonwealth**, crown, mm. sun, 1652, English shield of arms within wreath, *rev.* conjoined shields, mark of value above (S.3212), *an exceptional coin, struck on a large, round flan, mint state and choice, with full, original mint bloom; very rare and desirable thus* £,4000-4500

The so-called 'Breeches money' of the Commonwealth is notoriously difficult to find well-preserved and carefully struck. Apart from the pattern coins of 1651, they are often carelessly made on ill-prepared, irregular flans. To find a specimen that is both beautifully struck and wonderfully preserved is doubly difficult and any piece showing both these attributes deserves serious consideration.

- 146 **Commonwealth**, crown, mm. sun, 1653, English shield of arms within wreath, *rev.* conjoined shields, mark of value above (S.3212), *nearly extremely fine on a large flan, deep red tone* £,2000-2500

- 153 **Oliver Cromwell**, crown, by Simon, 1658/7, laur. head l., *rev.* crowned shield of arms (S.3226; ESC.10), *well-struck, a superb coin, practically mint state* £,3500-4000

The wonderful portrait of Cromwell by Thomas Simon is regarded as one of the masterpieces of seventeenth century numismatic art. In contrast to the often shoddily produced puritan designs of the Commonwealth, these coins showed what could be achieved with the use of the latest technology. It is hardly surprising that after the Restoration, the new king was anxious to replace the old hand hammered coinage with new machine-made currency.

- 154 **Oliver Cromwell**, crown, by Simon, 1658/7, laur. head l., *rev.* crowned shield of arms (S.3226; ESC.10), *about extremely fine* £,2500-3000

The specimen is pedigreed back to the late eighteenth century: -

Unlike other second bust crowns of Charles II, this coin is of superior workmanship, carefully struck with raised rims. It appears not to be the piece illustrated in Linecar & Stone. On close examination, the striking of the coin and its portrait are not dissimilar to the "Petition Crown" struck the year before, perhaps begging the question: was this piece also struck by Simon, now working under Roettier?

This piece was last sold in 1966 for the enormous price of £1300. As a matter of interest, in St James's Auction No. 1 the Carlisle shilling of 1645 which fetched over £11000 including premium also last appeared on the London market in 1966 when it fetched the much more moderate sum of £190.

This is a rare opportunity to acquire a truly magnificent coin, much rarer than the Petition Crown, which may again disappear from the market for decades.

As is often the case when a new monarch ascends the throne, there is a run of patterns from the opening years of the reign of George III. The present specimen is of the same design as that adopted for the currency and as such is a proof, although the type is still referred to as a pattern by some sources. The design has, in the past, been attributed to Tanner.

The only specimen the cataloguer has seen

The extraordinary reverse design with its oval shields and sunken border is like nothing seen on the adopted coinage either before or since. It does however, with its incuse numerals and delineated borders, echo the contemporary designs of Küchler used on the copper ‘Cartwheel’ coinage of 1797.

While this pattern by William Wyon is more imaginative than the design by Benedetto Pistrucci which was finally adopted for the currency coins in 1818, it was felt at the time that Pistrucci's engraving was more accomplished and it was his designs for the new coinage which succeeded those of Thomas Wyon in 1817/18.

This unofficial or private pattern is, as Linecar and Stone point out, an attempt to break with the normal tradition of coin portraiture with its large stylised head filling almost the entire obverse field. As might be expected in a country as conservative as Great Britain, nothing like this design ever appeared on the currency coinage.

An Interesting Group of Victorian Official and Private Patterns.

Although the United Kingdom did not finally adopt decimal coinage until February 1971, the idea had been under discussion since at least the 1840s. Two commissions had reported in favour of decimalization in 1841 and 1843 and the subject had been much debated in Parliament during 1847. Private patterns for the new coinage were made in the 1840s; official patterns for the florin by William Wyon appeared in 1848 while official dies, probably by James Wyon were produced at the Royal Mint in 1857 and 1859 for a new base-metal, decimal coinage. At the same time, many countries were experimenting with ways of producing lighter and more durable base-metal coins. A new bronze coinage was introduced in France in 1852 and in 1857 the USA replaced their copper 'large' cents with a smaller version in copper-nickel. Some patterns and trials produced at the Mint in 1859 reflect these experiments with new alloys and do not necessarily have any connection with the proposed decimalization.

This is a most unusual item which turned up in a collection in Australia many years ago. Other odd date, unlisted proofs have turned up there in the past – this may have something to do with the fact that a former Deputy Master of the Royal Mint retired there some time ago. VIP Proof gold Australian sovereigns and halves exist for 1899 and it may be that this coin is in some way connected to their issue. It also appears from the Royal Mint Records for 1899 that English coins were produced at the Sydney mint during that year – including a mintage of 17,000 florins. Wherever it was produced, it appears to be the only 1899 proof silver coin in existence – in fact the only veiled head proof coin which does not show the regular date of 1893. A unique opportunity to acquire an unpublished coin.

A Collection of Box-Thalers

Each of the following 10 lots is contained in a paper envelope from Spink & Son probably dating from the early 1960's, each with annotation and value in the hand of Donald Crowther ranging from £3 to a generous £10.

- 732 Germany, Mansfeld-Hinterort, David (1592-1628), a silver Box Thaler, dated 1612, 17th / 18th century, with hand-painted roundels to lid and base and a set of 12 mica roundels, part painted to create New testament scenes; the coin, St. George slays the dragon, *rev shield of arms dividing date and initials G – M, legend above, BEI GOT IST RATH VND THAT, 41.5mm (Davenport 6977; Pressler 376; Künker 72, 2829), an item of superb quality, the coin has been re-worked on both sides and tooled to create clarity, to make the box an outer rim with screw turning has been fitted, the mica roundels, some numbered, are generally in choice condition, whilst the box is extremely fine* £600-800

The base image, on which the mica roundels sit, displays Christ between a man and soldier in armour, both with their arms raised. The lid shows a saint, St. Christopher perhaps, and infant Christ with bundle of fire-wood. White Mica came mostly from Russian mines, hence its common name, Muscovite. It cleaved easily into paper-thin transparent sheets from which these roundels could be made.

- 733 Germany, Saxony, Johann Georg I (1591 - alone 1615-1656), a silver Box Thaler, 1626, H – I, 17th / 18th century, with hand-painted roundels to lid and base, and a set of 7 mica roundels, part painted to create amusing domestic scenes; the coin, half-length profile of the Elector right, in full armour, resting his sword on his shoulder, his helm before him, *rev a multi-divided shield of arms with 6 helms above, 43mm (Davenport 7601), the coin very fine, the lid roundel stained, the mica roundels generally in good order* £350-500

The base image, on which the mica roundels sit, displays three-quarter length figures of a young couple, he in plain doublet she in dress with blue bodice. The lid shows the same couple, he now seated and bewigged, in fine shirt and pantaloons, she standing beside him in an elegant orange dress. The mica roundels place them in various degrees of finery, sometimes reversing their sexes.

- 734 Germany, Augsburg, a silver Box Thaler, 1639, Free City coinage in the name of the Holy Roman Emperor Ferdinand III (1627-1657), 18th century, containing hand-painted roundels to lid and base, and a set of 6 complete and three damaged mica roundels, part painted to create scenes of contemporary religious significance; the coin, the pinecone before a panoramic cityscape, *rev laureate bust of the Emperor right, 41mm (Davenport 5039), coin and complete roundels very fine or nearly so, a small split in the lid (Augsburg-side)* £300-500

The base image, on which the mica roundels sit, displays a pilgrim, standing before a building, a curious small (child?) figure 'floats' in the sky alongside. The lid shows a monk standing by a table in an open window, the bible displayed upon it. One roundel has two figures kneeling before a bishop.

- 735 Austria, Charles VI (1685-1711-1740), Holy Roman Emperor, a mid-18th century Tyrolean silver Box Thaler, 1714, Hall Mint, with hand painted roundels within the lid and base; the coin, laureate bust of the Emperor right, legend commencing at his shoulder, *rev large crowned Imperial Eagle, 40mm (Davenport 1051; KM A692), well made for such a thin coin, good very fine, the paintings now both loose and a little 'grubby' with age* £200-300

The interior lid with a painting of a girl wearing a black dress with partly red skirt, and a bonnet; the base interior with a mildly erotic painting of a young naked lady reclining on a bed, looking over her shoulder towards her husband / lover, who sits beside her, fully clothed and is modestly looking away.

- 736** Germany, a silver Box Medal of Masonic interest, mid 18th century, containing full set of 13 hand-painted roundels; three allegorical females at an altar, TRES AD VNVM, in scroll above, *rev* infant genius with cornucopia and, on the ground around, the instruments of learning, 44.5mm (Goppel 1263), *box and contents extremely fine* £350-500

The box could well be the work of Abraham Ramshart whilst the contents could have been painted by Daniel Höckinger. The roundels, apart from a single break, are fully joined and are all numbered, their reverse sides painted with either a fruit or flower. The details of the roundels are as follows:- Interior lid – the Colossus of Rhodes, straddling a ship, the harbour beyond; Base – a flaming altar placed within a courtyard; 1- The Vatican (or similar building), “Antiqua renata videntur”; 2 – Noah’s Ark, “illæsa permecat undis”; 3 – a glass-blower(?) at furnace, “Ad huc Fragilis”; 4 – three eagles atop mountains, linked by a triangle, “Tres ad verum”; 5 – birds fly high over the globe, “Ad huc investigo”; 6 – the sun shines on a sunflower in a rural setting, “Ad unum dirigor”; 7 – a seal and dolphin on shore, ships beyond, Sperat patientia vices”; 8 – a youth, a small square box in his hand, approaches an altar topped by a sphere, “Fortunante praxi”; 9 – Shooting, a man loads a rifle another aims at a target, “Sicvis repressa valescit”; 10 – a saintly woman in a small boat holds an anchor, whilst being towed by a dolphin, “Spec vota secundat”; 11 – serpents guard the entrance to a mine or cave, Scrutino indefesso”; 12 – a spider builds his web atop an altar, “Bona inventa quæstus incrementa”; 13 – birds flying inside a church or temple, “Laudate Dominum”.

The roundels have a plain white reverse-side, and are linked in a ‘tree’ formation of 3, 3, 5, 3, and 1, and the details are as follows:- Interior lid - figures in a Palace courtyard; Interior base, a panoramic cityscape of Augsburg with the pinecone to the fore and scrolled black and white border; the interior roundels are headed by Johann, Elector of Saxony (1500-1539); Martin Luther and Philip, Duke of Hess; the remaining 12 with scenes actual and imagined, the last a gathering of Monarchs including Henry VIII and others from Denmark, Sweden, Holland, Vatican (?) and Spain, the Confession on the table before them.

- 738** Prussia, Friedrich Wilhelm I (1688-1713-1740), the Salzburg Emigrants, a silver Box, [1732]. undated and unsigned, containing a complete set of 17 hand-painted roundels, explaining the history; the medal, The emperor enthroned, a thankful emigrant family beside him, legend in scroll above, *rev* an emigrant family leave their country, legend in scroll above, *Gebe aus deinem Vatterland*, 44mm (Julius III, 221; Pressler 799; Künker 72, 2807), *medal and contents extremely fine though slight split in lid* £350-500

- 739** Prussia, Friedrich Wilhelm I (1688-1713-1740), the Salzburg Emigrants, a silver Box Medal, 1732, by P. P. Werner, containing a complete, but mis-matched set of 39 hand-painted roundels (though lacking those of lid and base), relating to the Victories of Frederick the Great; the medal, bust of the King right, his hair tied in a queue, wearing Sash of Order over decorative armour, *rev* the figure of Prussia stands holding her shield, her hand extended in greeting towards a group of emigrants, 45mm (cf. Whiting 464; Künker 72, 2808), *contents extremely fine, box, nearly so, with loose screw fitting* £300-500

The first of the Salzburg Emigrants arrived at the gates of Berlin on the 30th April 1732, "at four in the afternoon". The roundel to the lid and base are missing, the interior roundels form a linked 'tree' of 4 across and 10 deep (there is not , and appears never to have been, a number 40). The reverse side of the roundels are painted with a deep red and gold streaked leather effect, two together with inked dedication dated 1834. The set of roundels match those to those in lot 739 and have nothing to do with the Salzburg Emigrants, but commemorate the Victories of Frederick the Great. The details are as follows:- "; 1 - "Lowositz"; 2 - "Lageuder Sächsirch"; 3 - "Prag"; 4 - "Prag"; 5 - "Planian"; 6 - "Welau"; 7 - "Rosbach"; 8 - "Bresslau"; 9 - "Leuthen / Neumareck"; 10 - "Schweidnitz"; 11 - "Schweidnitz"; 12 - "Cüstrin"; 13 - "Colberg"; 14 - "Hoeh Kirchen"; 15 - "Neiss"; 16 - "Dresden / Vorstädte"; 17 - "Torgau / Leipzig / Wittenberg"; 18 - Cumersdorff"; 19 - untitled; 20 - "Hoyerswerda; 21 - "Dresden"; 22 - "PAX"; 23 - Landshut"; 24 - "Leignitz"; 25 - "Strehla"; 26 - "Berlin"; 27 - "Leipzig"; 28 - "Torgau"; 29 - "Colberg"; 30 - "Colberg Capitulirt"; 31 - "Russ K. Elizabeth Tod"; 32 - Freid mit Schweden"; 33 - "Czerruschs Corps vereinigt sich mit Preuss; 34 - "Fried mitt Russland"; 35 - "Schweidnitz"; 36 - "Frejberg"; 37 - "Reichs Neutra"; 38 - "Hubertsberg"; 39 - "Fried Prälinuorien". Also included is a single 'spare' roundel, numbered 12, showing a pilgrim between Christ and Moses, "Thut Buse und glaubet an das Evangelium".

- 740** Prussia, Frederick the Great (1712-1740-1786), The Silesian Wars and the Treaty of Bresslau, a silver Box Medal [1742], with a seemingly complete set of 17 roundels, by Daniel Höckinger; bust of Frederick on pedestal with three figures including Peace and Bellona, *rev* a Genius holds a shield with a bust of Maria Theresia, below seated figures of Justice and Piety, HIS VIRTUTIBVS ORTA, 47mm (Olding 543; Julius 2254; Goppel 1256), *contents very fine but no longer linked, the box better* £300-500

The Treaty of Breslau saw the end of the Silesian War, and Maria Theresia was forced to give up her control of Upper and Lower Silesia. The roundel to the lid and base are loose, the interior roundels are now no longer linked, but are numbered and the reverse side of each is decorated with a fruit or flower and they commemorate the battles and events of the war. The details are as follows:- The Interior lid - Jupiter seated amidst trophies accepting sword from turbaned soldier, "Mavors minc instruit armis"; the base, this signed - a turbaned and bewhiskered Sultan kneels before Victory and lays down his arms, "Reddit Victoria pacem"; the interior roundels, 1 - "Borussoru in Silesia"; 2 - Castellum Ottmachaviense expugnator"; 3 - "Glogavia hostili impetus occupatur"; 4 - "Victoria in Moluicensis"; 5 - "Briga Occupatur"; 6 - "Uratia lavia capta"; 7 - "Civitas homagium praestat"; 8 - "Nissa ad deditioem coacta"; 9 - "Homagium Silesiae infer."; 10 - "Tropavia occupata"; 11 - "Olomatium expunatum"; 12 - "Iglavia praesidio firmatur"; 13 - Comitatus Glacensis subjecto"; 14 - "Victoria ad Chaottusiz"; 15 - "Czaslavia subjecta"; 16 - "Pax Publicata"; 17 - "Felix Regis reditus".

The Julius specimen, like this, included 17 roundels plus the lid and base.

- 741** Prussia, Frederick the Great (1712-1740-1786), The Victories of the Reign, a silver Box Medal [1763], by Abraham Ramshart, containing a complete set of 39 hand-painted roundels (but lacking that to the base); the king on horseback to left, an encampment beyond, FREDERICVS REX BURUSSOR: EL: BRAND:, *rev* scales held from heaven balancing books and sword, the Prussian eagle between, EX UTROQUE MAXIMUS, 46mm (Olding 681; Julius 2440), *box and contents extremely fine* £300-500

The roundel to the base is missing, the interior roundels match those to those in lot 739 and have nothing to do with the Salzburg Emigrants. As with the previous they form a linked 'tree' of 4 across and 10 deep (there is and appears never to have been, a number 40). It would seem from Julius that his specimen contained the full tree of 39 plus the lid and base to make up the set of 41. The reverse side of the roundels are painted with a deep red and gold streaked leather effect. The details are repeated and are as follows:- Interior lid - "Prince Heinrich"; 1 - "Lowositz"; 2 - "Lageuder Sächsirch"; 3 - "Prag"; 4 - "Prag"; 5 - "Planian"; 6 - "Welau"; 7 - "Rosbach"; 8 - "Bresslau"; 9 - "Leuthen / Neumareck"; 10 - "Schweidnitz"; 11 - "Schweidnitz"; 12 - "Cüstrin"; 13 - "Colberg"; 14 - "Hoeh Kirchen"; 15 - "Neiss"; 16 - "Dresden / Vorstädte"; 17 - "Torgau / Leipzig / Wittenberg"; 18 - Cumersdorff"; 19 - untitled; 20 - "Hoyerswerda; 21 - "Dresden"; 22 - "PAX"; 23 - Landshut"; 24 - "Leignitz"; 25 - "Strehla"; 26 - "Berlin"; 27 - "Leipzig"; 28 - "Torgau"; 29 - "Colberg"; 30 - "Colberg Capitulirt"; 31 - "Russ K. Elizabeth Tod"; 32 - Freid mit Schweden"; 33 - "Czerruschs Corps vereinigt sich mit Preuss; 34 - "Fried mitt Russland"; 35 - "Schweidnitz"; 36 - "Frejberg"; 37 - "Reichs Neutra"; 38 - "Hubertsberg"; 39 - "Fried Prälinuorien"
